Student Achievement

Student learning and achievement is measured partly by the Capstone Comprehensive Exam given to all students in their final semester of study. Questions for the exam are provided by faculty members teaching core courses. Responses to these questions provide an indication of how well the students are comprehending the core knowledge, skills, and values. Thesis and professional reports are evaluated to determine how well students are incorporating core knowledge. Each semester University and College student surveys are conducted for classes taught during the semester. The results of the surveys assist faculty members in determining how well students are learning within their classes. The Coordinator for the Planning Program reviews the University and College faculty surveys.
